CAREER SUMMARY

Software Engineer with 5+ years of experience designing and delivering scalable web and mobile systems in production environments. Strong background in backend architecture, performance optimization, and building AI-powered or data-intensive features across the full development lifecycle. Led system improvements that enhanced reliability and reduced load times by up to 40% across multiple client-facing platforms.

WORK EXPERIENCE

Lead Backend/AI Engineer | **Sovereign AI** 2026 – Present

- **Real-Time Theft Prevention:** Developed live CCTV analysis software that automatically flags 90% of suspicious shoplifting events, allowing store security to stop theft 70% faster and prevent inventory loss.
- **Cost-Efficient AI:** Designed an AI shoplifting detection engine that runs entirely on standard store computers without requiring expensive graphics cards (GPUs), keeping operational infrastructure costs at just $1/month.
- **Instant Security Alerts:** Integrated an automated phone notification pipeline that delivers critical theft alerts from the store cameras to a security guard's phone in under 2 seconds.
- **Zero-Downtime Updates:** Built a silent, self-updating background installer for Windows and Linux that hot-swaps updated AI models into memory every 5 minutes with zero camera downtime.

Full-Stack Mobile App Engineer | **Ferify** Sept 2025 – Mar 2026

- **Real-Time Data Engine:** Developed a transit tracking app using React Native and live data streams to process 10,000+ monthly queries, reducing passenger fare overcharging by 85% across 100+ routes.
- **Engagement Growth:** Launched a gamified rewards engine supporting 1,000+ daily active users, boosting net user engagement by 40% while maintaining high database integrity.

Team Lead | **Crea8genius Technologies** Mar 2025 – Aug 2025

- **SaaS Delivery:** Led the full software development lifecycle for a client-facing EdTech SaaS platform, resulting in a 40% reduction in administrative overhead for clients by digitizing course delivery.
- **Agile Leadership:** Spearheaded the adoption of Agile methodologies within the development team, improving engineering delivery efficiency by 30%.

SKILLS

Languages & Frameworks: Node.js, Express.js, Python, Flask, TypeScript, JavaScript (ES6+), React.js, React Native (Expo), HTML5, CSS3, Tailwind CSS
Databases & Caching: MongoDB, PostgreSQL, Supabase, Pinecone DB, Redis, NoSQL Schema Design & Query Optimization
Cloud, DevOps & Systems: GCP (Google Cloud Platform), Render, Vercel, Docker, CI/CD Pipelines, Git, GitHub
Protocols & Methodologies: RESTful APIs, WebSockets, Socket.io, Agile, Scrum, Unit Testing, Performance Optimization, System Design, UI/UX Principles
AI & Machine Learning: PyTorch, ONNX, OpenCV, YOLOv8, Pose TCN, MobileNetV3, OpenAI API, Gemini API, LangChain.js, Vector Embeddings, Vector Search

EDUCATION

Bachelor of Science in Computer Science | Osun State University, Nigeria Nov 2020 – Sept 2024
